

business income express service

Our business income (BI) express service is designed to respond to high volume, low severity time element claims. We combine the experience of our forensic accountants with processes specifically set up to expedite the handling of claims.

These types of losses, like many reported from storms and less severe hurricanes, include:

- Civil authority actions
- Property damage
- Power outages
- Ingress/egress

BI express claims will be billed on a time and expense basis, with a fee cap based on the value of the time element claim.

- Fee cap: \$1,500 for claims less than \$25,000
- Fee cap: \$2,500 for claims of \$25,000 - \$50,000

The BI express service is intended for low complexity claims that do not include manufacturing operations, partial operations, make-up sales, co-insurance, etc.

If a BI express loss ultimately exceeds \$50,000, or if other unforeseen complexities arise, we will obtain client approval before converting the file to normal time and expense claim handling.

In such a case, a Sedgwick accountant will discuss the claim with the client to ensure a clear understanding of the issues involved. The client can then decide whether to proceed under a new claim-specific budget or not.

To submit a BI express claim, please send an email with "BI express" in the subject line to: fas@sedgwick.com. Include the file number and any documentation or instructions you may have. We will then contact you to obtain any additional information needed. You are also welcome to call Rob Fox at the number listed below.

Contact Sedgwick today to learn more about our BI express service.
