

Building consultancy division

Specialist building consultants

A full range of specialised building consultancy services to the insurance and private sectors.

We've built an undisputed reputation for excellence, delivering the best outcome for our clients in the insurance sector. Now we offer our expert advice to private sector customers.

We pride ourselves in acting as an independent resource during the investigation and rebuild phase, following property damage, supplying trusted and accurate replacement cost estimates as well as managing a project from start to finish.

We work with builders on our clients' behalf to eliminate waste, improving efficiency and profitability. Technology is at the forefront of our approach to minimise time in the provision of our reports.

Our qualified experts are purposely trained in assessing each case on its individual merits, enabling them to truly understand and deliver to each customer's unique need.

Our building consultancy division in numbers

43
building professionals

over 80% are chartered surveyors or chartered builders

730
years
of collective experience in the industry

1000+
repairs a year
administered by us across a wide range of building types

1500+
technical inspections
is what we carry out each year

1000+
insurance valuations
is what we complete each year

£75,000
was the average value of the repairs administered by us in 2016

Who we are

We're a local professional building consultancy who provide surveying services focused on delivering the service and information you need in a manner that's quick, cost-effective and innovative.

Why us

We've a number of benefits to offer to private sector customers. We have the expertise, technology, support teams and working practices that will:

- Save you money
- Save you time
- Make you more competitive
- Provide peace of mind
- Make it easy to do business with us
- Offer a partnership focused on shared learning

Having a background in the insurance sector means:

- We're acutely aware of the importance of communication and minimising the impact on building occupiers
- We understand the impact of time, and the importance of reducing it
- We know the need to control costs, and get it right first time
- We're experienced in working with vulnerable customers
- We flex to take on large volumes of instruction quickly without any loss of service
- We've access to a national network of managed contractors working to fixed rates

What we can offer you:

- Quick and cost-efficient delivery of reports from-site
- Self-service access to reports
- Tailored reports and Video reports
- Portfolio views to create more understanding of the condition of your assets
- Access to our own managed schedule of rates
- Help to budget and reduce costs for repairs/investment in maintenance
- Use of technology to save money and time
- Market leading flood resilience surveys supported by the Department for Environment, Food and Rural Affairs (Defra) and BRE
